DETAILED ACTION

Election/Restrictions

1. Claims 7-12, 15-17, and 19-20 are allowable. The restriction requirement between species I and II, as set forth in the Office action mailed on 9/19/08, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.**

2. Claim 18, directed to species II is no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim 16. However, claims 1-6, directed to a method for twin-sheet thermoforming plastic fuel tanks, are withdrawn from consideration because they do not all require all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert E. Goozner on 10/22/09.

The application has been amended as follows:

Claims 1-6 are cancelled.

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance:

The prior art references of record do not teach or suggest a sheet transfer device which includes a vacuum box or bell element defining a bottom open vacuum chamber, movable up and down in respect to the processing line, and along the same processing line, the vacuum box or bell element is provided with a pneumatic clamping device having at least one air suction channel peripherally arranged around the edges of the vacuum box or bell element, the air

suction channel is connectable to an air suction source to clamp the sheet at its upper side along its peripheral edge, and to close the vacuum chamber by tightly clamping the plastic sheet, and the vacuum box is connectable to the vacuum source by vacuum control means for vacuum holding the heated sheet in a suspend, horizontal and substantially flat condition, during movement of the transfer device along the processing line.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to XUE LIU whose telephone number is (571)270-5522. The examiner can normally be reached on Monday to Friday 9:30 - 6:00 EST.
